Why Do I need F-1 Mix?
F-1 Mix is a chelated Magnesium, Manganese, Iron, and Sulfur Source, designed for soil and/or foliar application, to prevent and correct pre-existing Mg, Mn, Fe, and S deficiencies as indicated by plant leaf, visual, and/or soil testing. Since the ingredients in F-1 Mix are 100% water soluble and immediately available to the plant (When used as directed), this product is extremely efficient as a foliar spray in situations where a rapid response is desired. Results are often evident one to two days after application. Research has shown the plant can assimilate micro nutrients better via foliar application than if the micro nutrients were applied to the soil. The response is quicker and seefe to be more effective.

Storage: Keep container sealed tightly when not in use. Do not expose to sunlight for long periods of time. Store in temperatures between 5 C (41 F) and 25 C (77 F).
